

# **Ladywood NNS Skills Audit Survey Report**

**By Athac**

January 2023

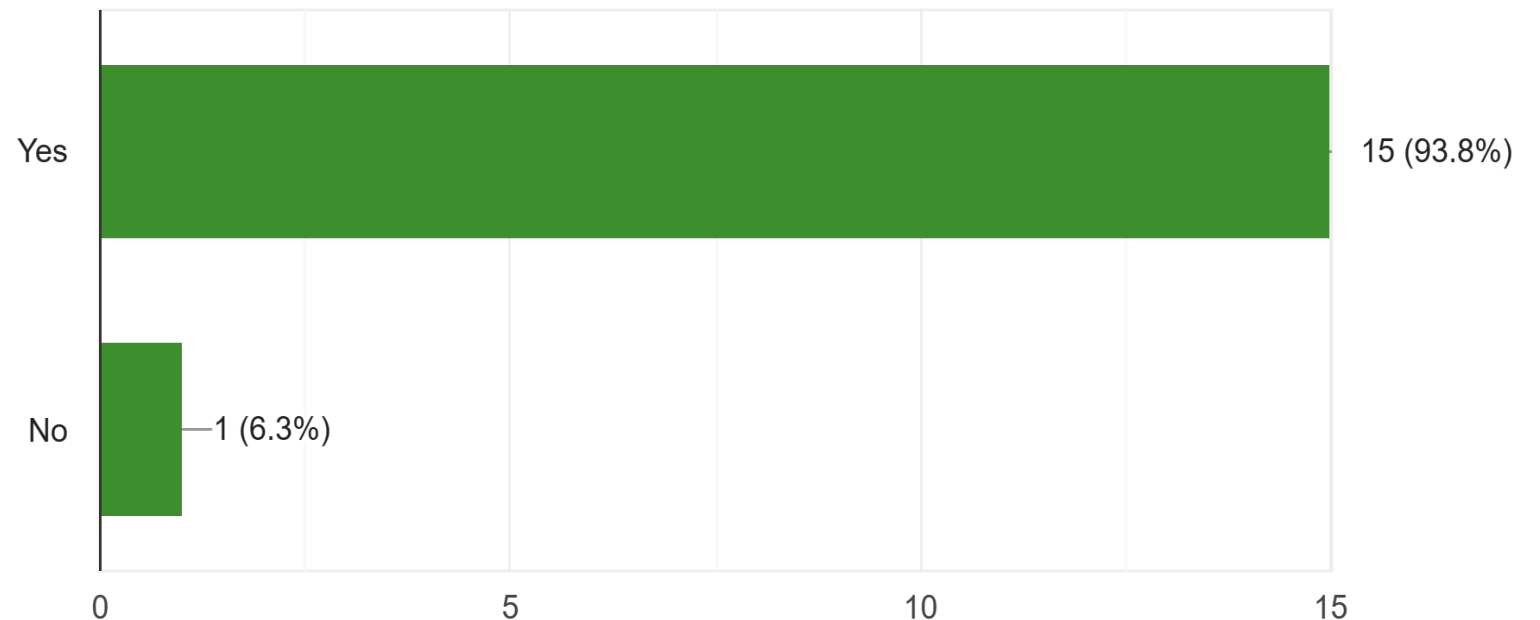

# Overview

In order to identify the development needs of local organisations and enterprises in Ladywood a skills audit was undertaken of community assets. This proceeded the delivery of NNS pop up awareness sessions delivered across Ladywood localities by the Manager and Project Co-ordinator during November. These engagement sessions highlighted the key aims/priorities and the development support which would be tailored around identified needs of local assets. The register of contacts compiled were each sent a skills survey followed up by a second reminder with a cut off date in December which did engage more respondents to complete. Some email address had incorrect details. We would recommend all contact emails address are checked. 29 organisations were sent out the audit with 16 individual responding to the survey.

There was overall agreement from organisations and enterprises saying 'yes', they wanted opportunities for ongoing training and skill development.

Are you interested in accessing training or skill development for your micro business or organisation?

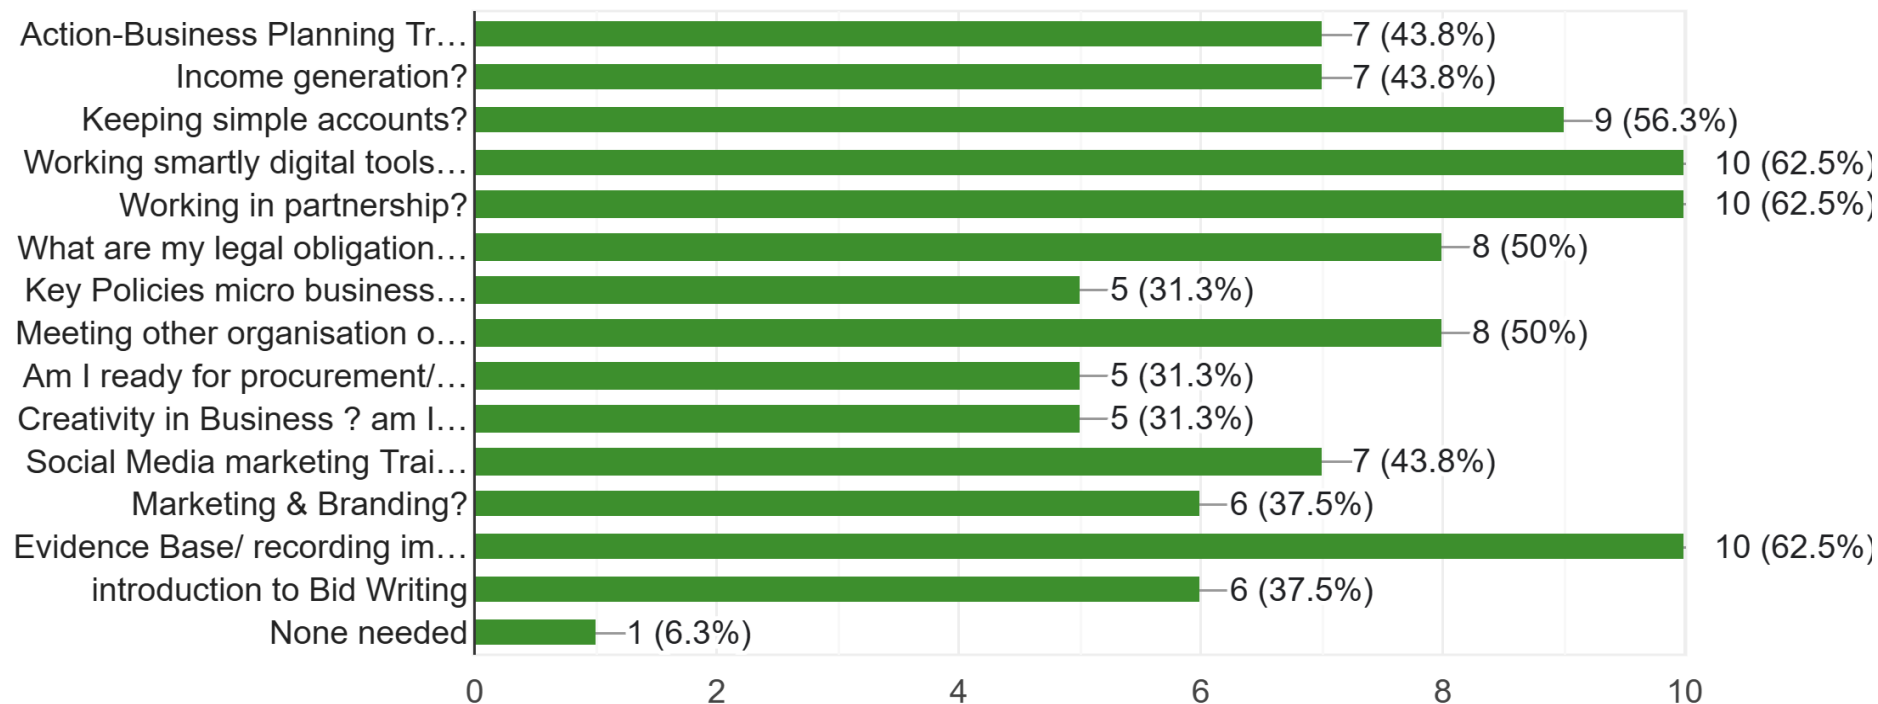

16 responses

Organisations identified working smartly using digital tools and partnership working were key areas they where they would like to develop skills. Bid writing was also highlighted as many of the organisations are likely to want to explore ongoing funding and income generation to maintain services.

Would you be interested in attending any of these development opportunities? Tick all that applies

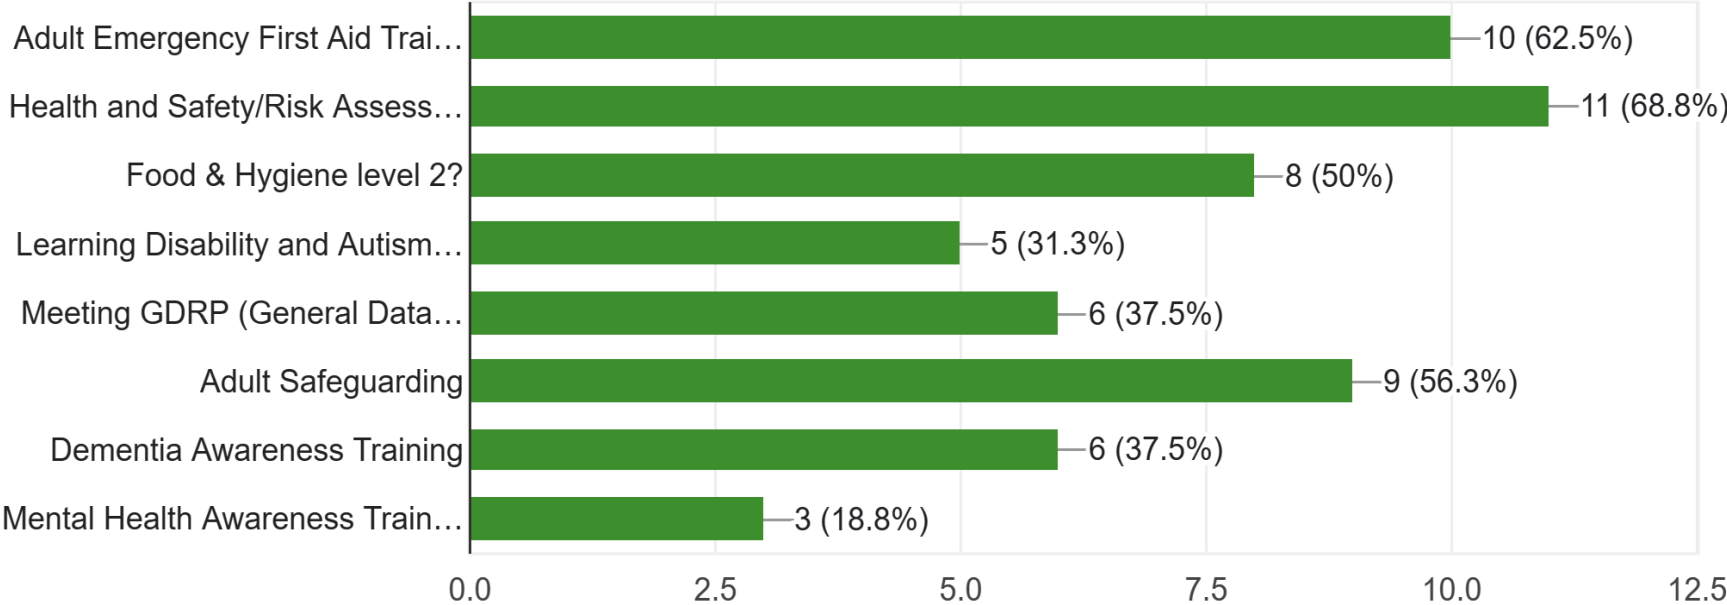

16 responses

Areas of core training identified by organisations were Adult First Aid, Health and Safety and Dementia training. This results also indicates the areas of current priorities and how a monthly development programme could be scheduled based on level of interest in subject area.

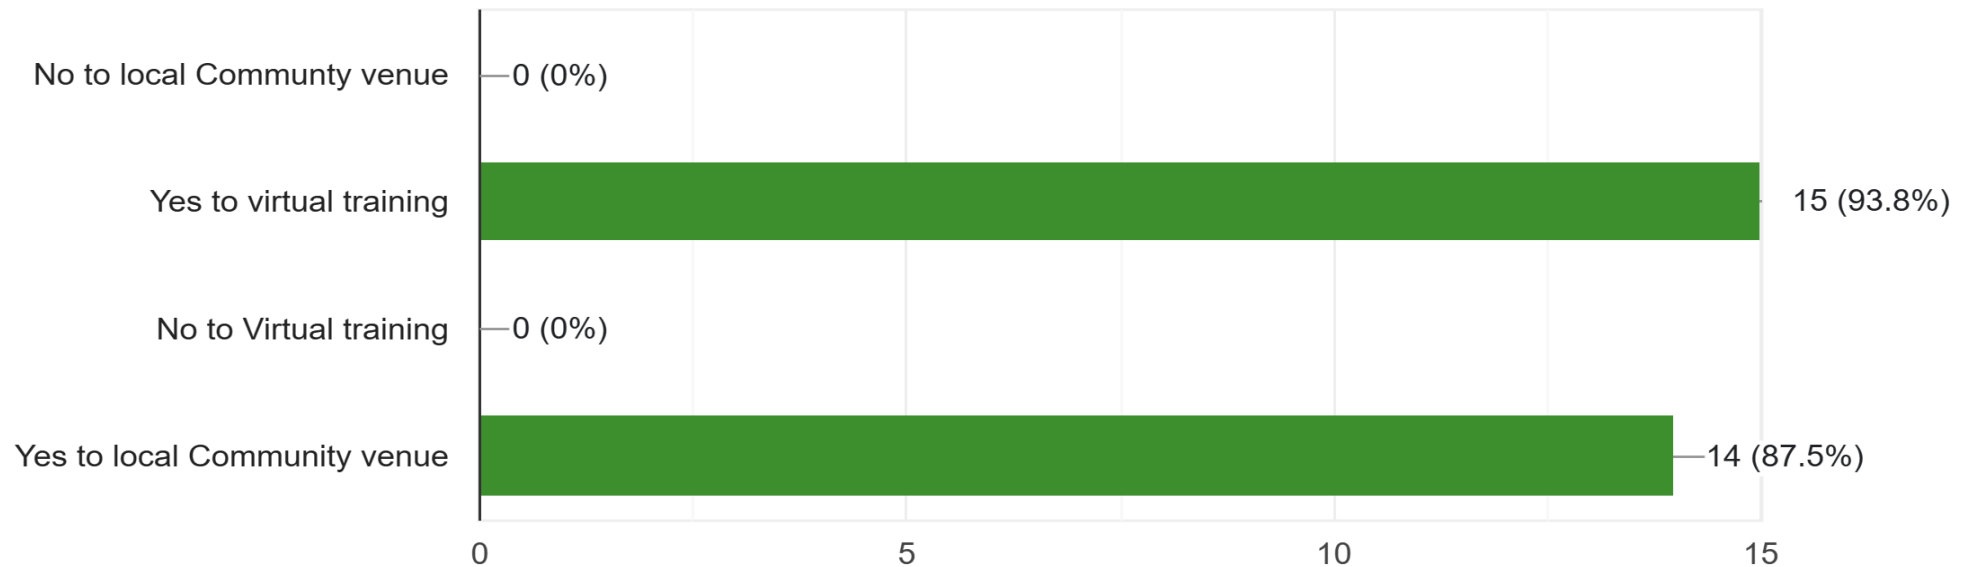

Are you interested in attending ?

16 responses

Training venues both virtually and community venues were both equally valued as suitable for training. It maybe blended development opportunities both in person and online would allow flexible access to local assets.

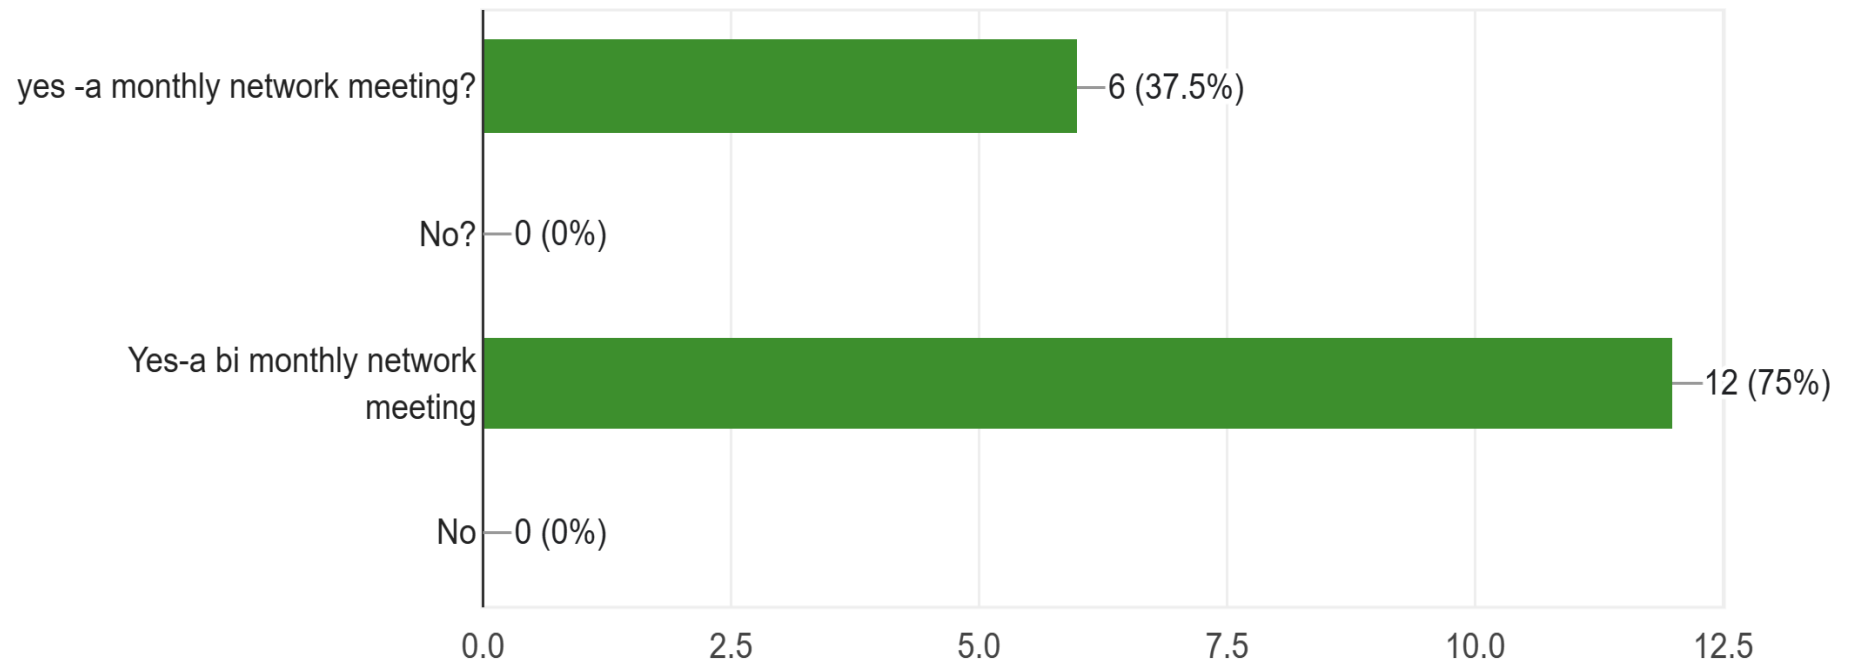

Would you be happy to access training in both local community venues and or virtual sessions?  
please tick all that apply
